

DESIGNER ROLLER SHADES

Designer Roller Shades have reinvented the traditional roller shade with modern styling and design. They offer excellent light control while providing a clean, stylish look for your home

***Style.** With nearly 200 fabrics to choose from, select a fabric to fit your decor. Whether it's an elegant, tailored design, natural grass cloth or a sophisticated silk-like fabric, there is a roller shade to suit any taste*

— The Dual Roller Shade option allows you to pair two fabrics of varying opacities on one cassette for optimum light control and an intriguing layered effect.

— Add your decorative touch to your shade with a choice of designer tapes, decorative end caps or exposed faux wood slats.

— Our motorized operating system, with remote control, wall switch or automatic timer, makes hard-to-reach windows a snap to operate.

look

feel

Our fabrics are grouped in three categories – Traditional, Natural and Soft – making it easy to find the style you prefer

TRADITIONAL - Classic look, traditional feel. These fabrics are timeless choices that can stand alone or work well with top treatments and draperies

NATURAL - Casual, comfortable in any setting. The look of grass cloth, chenille and other natural elements blend effortlessly with your décor.

SOFT - Elegant texture, gentle hand, luxurious colors - experience a new direction in roller shade fabrics

INSIDE MOUNT

OUTSIDE MOUNT

STEP 06 determine a mounting preference

FOR AN INSIDE MOUNT - Be sure the window opening is deep enough to install the mounting bracket. For standard shades you will need at least 1.5" for a minimum mounting depth, or 2.5" for a flush mount. For other shade types, please consult your dealer.

1. Measure the width inside the window opening at the top, middle and bottom. Use the smallest measurement so the shade can function properly.
2. Measure the height inside the window opening at the left, right and center.
3. Measure the window on the diagonal. If the two diagonal dimensions are not exactly the same, utilize an outside mount for optimal light control and privacy
4. Measure the window depth

FOR AN OUTSIDE MOUNT - Measure the desired width and height. The shade should overlap the window opening at least 2" on each side and at the bottom to minimize light gap

INSIDE MOUNT

OUTSIDE MOUNT

NOTE: Measure the exact window intended for the shade, and do not assume any two windows are the same. Use a 1" steel tape measure

DO NOT use cloth tape measures, as they tend to be inaccurate. Measure to the nearest 1/8" dimension. Do not take any deductions. Hunter Douglas will make the necessary adjustments.

STEP 07 take measurements
